**TOWN OF PERALTA, NEW MEXICO
APPLICATION FOR SEWER SERVICE
PROPOSED LOCATION FOR SERVICE COMPONENTS**

INSTRUCTIONS

Provide a sketch of the property to be served and the desired location of the Grinder Pumping Unit, Pressure Service Line, and Control Panel. Describe where wells, water lines, all buried utilities such as gas lines, sprinkler lines, etc..... Contact the Utilities Director for an onsite review of the sketch and obtain concurrence prior to submitting application. The Utilities Director is available to provide assistance in the preparation of this sketch. The Gravity Service Line must be uncovered near the point the connection is to be made prior to the on-site review.

SKETCH

APPLICANT'S STATEMENT

I concur with the general location of the existing and new sewer facilities shown on this sketch and hereby grant permission to the Town of Peralta to install and maintain the sewer grinder system.

PLEASE READ AND INITIAL:

I understand that:

- A. Contractor shall meet with each property owner and Utilities Director to conduct a pre-assessment of the installation and determine the scope of work to be conducted on each property. _____
- B. All parties involved, including Contractor, Property Owner and Utilities Director shall be in agreement of the scope or work, sketch of property, and terms as spelled out in the Application for Sewer Service and Location for service components before installation of grinder pump work commences. _____
- C. Property owner will be responsible for identifying as well as removing and replacing any unusual circumstances such as landscaping, concrete, paving, fencing, sprinkler systems, buried electrical wiring, plumbing, or anything else that may interfere with the installation. _____
- D. If the contractor damages any items identified by the property owner prior to any work beginning, then contractor will be responsible for repair of such damages. _____

If the Contractor damages any items not identified by property owner, the contractor will not be responsible for repairs. Property owner shall be responsible for their own repairs of items not identified prior to work commencing. _____

- E. Contractor will make every effort to minimize any disturbances caused by installation of the grinder pump. _____
- F. Contractor and Utilities Director may elect to bypass a property installation if it is determined that the installation of grinder pump will create too much of a disturbance or damage to property, unless an alternative installation is agreed upon, or the property owner assumes responsibility for clearing the impediments or barriers to installation. _____

G. The Property owner is to certify the possession of a dedicated 220-volt, 2 pole, 30-amp breaker. _____
